DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim language as presented does not adequately describe a device with clearly defined features. Claim is being examined as though it is a dependent claim, dependent on claim 1.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Walters et al. Walters et al teach a portable audio database device comprising a portable housing 41, microprocessor 120 and memory (see abstract), speaker 48, volume control 82, microphone 46, battery power source 164 (figure 4, per claim 6), record switch 68, play switch 66, rewind switch and forward switch in control panel 64,

start/stop switch 70 (column 16 lines 8-9), temporary erase switch 75, permanent erase switch 76, question number display 44, memory use display 101 (per claim 5), inherent on/off switch, headphone jack 84, AC adaptor jack 86 and digital line output jack 144. Taught in the abstract, the memory structure of the device is hierarchical with the level being used for messages. The messages can be a question and answer set. Pressing record while in the Message category will begin recording of a question and answer (column 15 lines 28-47). Regarding claim 4, section 106 of the LCD shows the message number (which qualifies as the question number if questions and answers are being recorded). Column 20 lines 15-17 state that the control panel 64 is used to scroll through the messages allowing the user to skip a question (per claim 2). The button 75 may be used to mark an audio message and move it to another location. Thus, an user can mark a message in one message category where questions and answers are recorded and move it elsewhere, thereby temporarily deleting it and being able to restore it at a later time. See column 5 lines 30-48. Claim 3 is met. As to claim 7, there is disclosed external memory module 124 which can be inserted into memory card slots 90 or 92. See column 7 line 58 – column 8 line 8.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Iida, US Patent 6,286,253; Yamada, US Patent 6,311,092; D'Agosto, III, US Patent 6,321,129; Terui et al, US Patent 5,903,871; Barker, US Patent 5,548,566; Taylor et al, US Patent 5,684,506.
